INTRODUCTION

LA Foam fabricates EPS (Expanded Polystyrene) foam into custom shapes for use by Plasterers, Contractors, Film & Television Art Directors as well as Event Planners and Home Decorators. Mainstream adoption of EPS foam shapes during the building process has become more popular over the years as consumers of these products discover the ease-of-use and costs savings benefits. LA Foam has been right there providing great customer service and top quality products as the demand in California and elsewhere continues to rise. LA Foam now offers a wide range of pre-coated (base, scratch and paint ready) foam that is cost effective and easy to install.

Benefits

EPS Foam can be cut into virtually any shape or size you need. It is lightweight, fire rated, safer than concrete and does not have the sagging, warping or water-related issues that wood has. It is less expensive than comparable other choices, cheaper and easier to transport and work with and is indistinguishable from traditional materials after proper coating and/or painting is applied.

Why LA Foam

LA Foam has stated-of-the-art equipment, a customer-oriented approach, and a focus to be the best in our business. At LA Foam, quality control is job one. Combine this with top notch customer service and a staff that truly cares about the success of your project and you get a powerful combination. LA Foam also has enormous production capacity for raw and pre-coated foam to handle large, complex orders on time and on budget. More than just foam and cutting tools: LA Foam offers the expertise to understand your blueprints, the attention to detail to get your complex cutting completed correctly and the range of shapes and CAD setup experience to work creatively with you in developing your signature project.

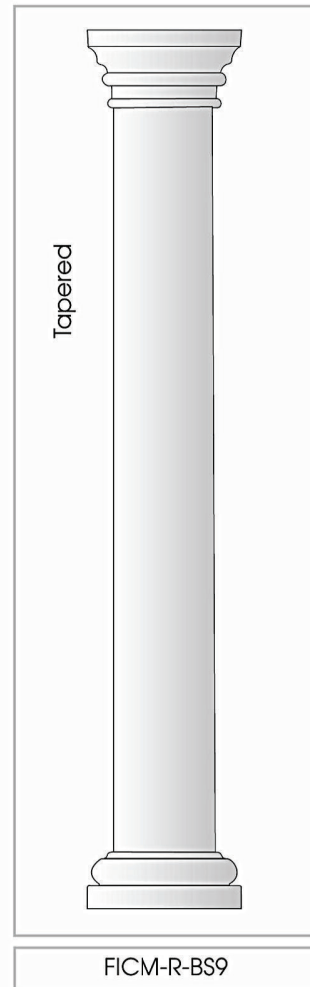

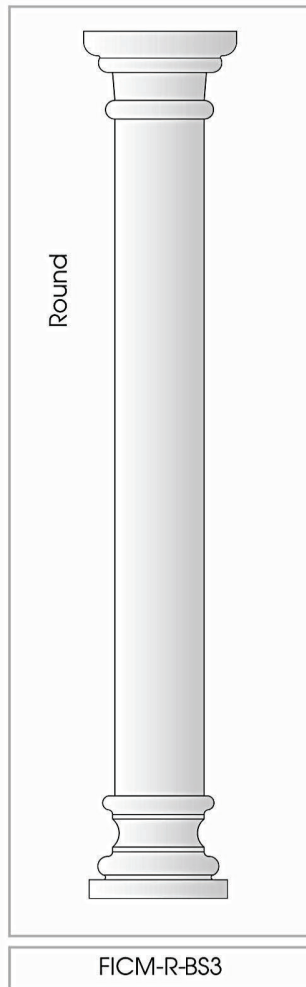

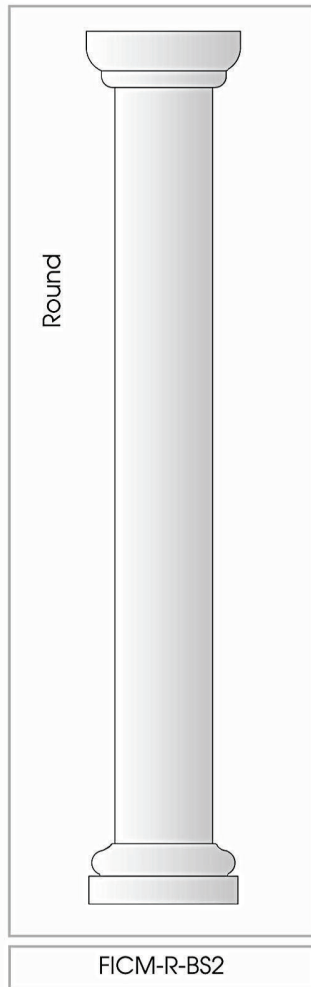

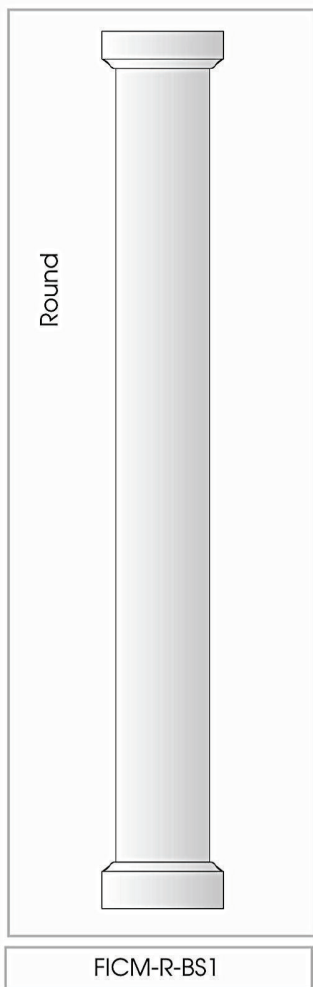

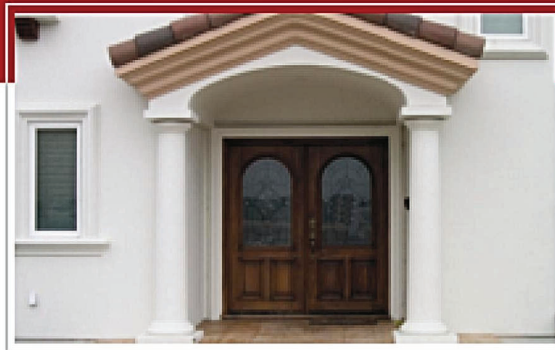

LA Foam tiene el compromiso de servir a nuestra comunidad de habla hispana. Tenemos el orgullo de hablar y ofrecer servicios en español. Permítanos trabajar con usted para que su proyecto sea todo un éxito.

La Foam is based in the San Fernando Valley of Los Angeles and serves the entire Southern California area. Were just a phone call away to answer any questions, or visit us. At LA Foam, you are always welcome!

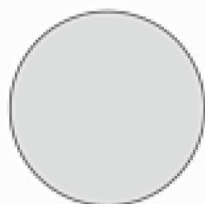

COLUMNS, CAPS & BASES

LA Foam offers a wide range of fluted, round, square, tapered and roped columns. You can choose between solid or half with & without cut-outs. Your columns, caps and bases can be cut to any custom specification, or you can request that they match architecturally accurate dimensions.

All shapes can be ordered pre-coated.
All shapes are available in any size.

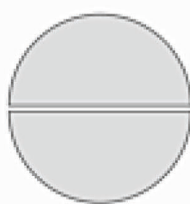

Standard Column diameter available in 8", 10", 12", 14", 18" and 24".
Custom sizes available. All bases can be cut as caps.

BANDS & SURROUNDS

Belly Bands can be used to divide the first and second floors of a two-story building or as window surround trims. Many people find that bands provide a pleasant decorative accent to an otherwise dull or flat surface. Bands can also be used for interior applications.

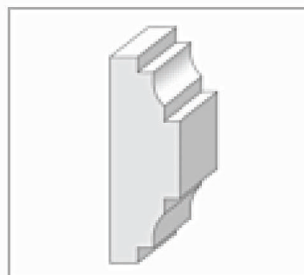

All shapes can be ordered pre-coated.
All shapes are available in any size.

WINDOW SILLS & TRIMS

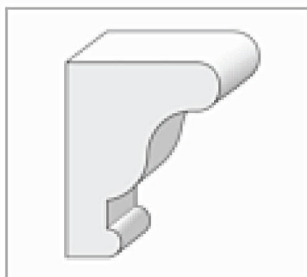

Window sills are used to add a shelf-like detail to the bottom portion of the window. Trims can be used as either sills or surrounds but when used as a sill it is usually made larger than the surround.

All shapes can be ordered pre-coated.
All shapes are available in any size.

QUOINS, SHUTTERS & QUATREFOILS

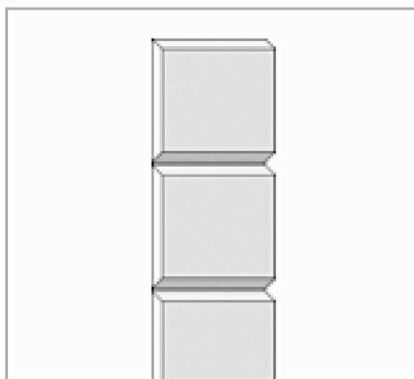

Quoins offer your corner assembly a look of regal strength and dignified presence. Whether applied to brick, stone or stucco, quoins make a statement. Many shutter styles are available to accent your project. Quatrefoils are used to draw attention to an area or provide a decorative attraction on an otherwise featureless surface.

All shapes can be ordered pre-coated.
All shapes are available in any size.
